THE CONSULAR

26 APRIL 2022

SOUTH AFRICAN HIGH COMMISSION DRC

RE: MOTIVATION FOR TEMPORARY RESIDENCE PERMIT FOR MEDICAL TREATMENT IN SOUTH AFRICA FOR MR NYEMBO YA LUMBU MUTUMBIWA LEON ODERIC AND HIS WIFE MRS MUSAMBI KABONJA

This serves to confirm that Mr Mutumbiwa Leon Oderic Nyembo with Passport Number OP 0513637 has been diagnosed with Prostate cancer. He has undergone surgery at Lenmed Hospital and has received further treatment with Radiation Therapy with a technique known as Intensity Modulated Imaged Guide Radiotherapy (IMRT).
There were no facilities and expertise for this kind of treatment in his home country. He received Radiotherapy from 25/09/2019 till 13/11/2019. He received a total dose of 76.37 Gy.

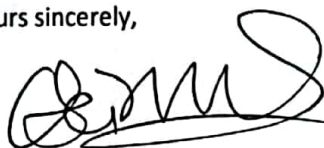

Due to his clinical condition, he needs constant care and support from his wife, Mrs Kabonja Marie Philippe Musambi with Passport number OPO251362 who accompanied her. The acute side effects of the radiotherapy settled down within 6 to 8 weeks after the treatment. He will need to come for follow up examination. An appointment has been scheduled for him on 1st June 2022.

He needed to be followed up every three months for the next two years after which he will be seen once every six months until five years. If he is in remission after five years then he will be considered cured of the prostate cancer and he will then be subsequently seen once every year for medical examination including digital rectal examination, relevant blood tests and radiological examinations and bone scan when necessary.

Please kindly grant him six months permit to enable him undergo his medical examinations and undergo any other necessary treatment.

Thank you very much for your kind cooperation and assistance.

Yours sincerely,

DR. DANIEL OSEI-FOFIE FCRADONC (SA)
